Indicative promotion thresholds for 2006

As stated at point 1.4 above, the definitive promotion thresholds will not be established until the end of the promotion exercise, since they are determined by the number of promotions possible and the final list broken down by total points for each grade.

The indicative promotion thresholds which DG ADMIN is required to publish before the promotion exercise result from a statistical estimate based on a number of assumption about how the exercise will progress. It is the best estimate available.

The results are obtained from the largest group of officials, those paid from the operating budget, but they are also valid for those paid from other budgets.

As in previous years, the indicative thresholds may be exceeded by 0.5 to 2 points.

The indicative thresholds and some reference information are given below.
